ELI-te™
ELECTRONIC LOCK INDICATOR – TECHNOLOGY ENHANCED FIFTH WHEEL COUPLING ASSISTANT
ELI-te™ assists the driver with LED lights on the fifth wheel to allow for quick recognition of a successful or failed coupling attempt. Drivers no longer need to guess on the success of the couple. ELI-te™ prevents potential mistakes before they happen.

The ELI-te™ feature provides a significant advantage to fleets looking to provide their drivers with user friendly assistance that enhances coupling efficiency, driver confidence, and safety.

- Successful couplings trigger white LED lights to assist the driver with visual lock inspection prior to performing a tug test.
- Unsuccessful coupling triggers flashing red LED lights to notify the driver of an issue prior to tug test.
- Promotes consistent and thorough driver coupling inspections.
- Robust electrical components: sealed one-piece harness, long-life LED lights, durable inductive sensors, and steel encased logic module ensure reliable operation in the toughest conditions.
- Superior FW35 Series TwinLock™ reliability enhanced with intelligent logic and interactive LED lights to assist with coupling inspections.
- ELI-te™ option for the FW35 Series is user friendly, requires minimal maintenance, and is backed by a 2-year warranty.
AN OPTIONAL FEATURE FOR THE HIGHLY POPULAR FW35 SERIES FIFTH WHEELS

Energy efficient LED lights and sensors are strategically positioned under the top plate for maximum function, reliability, and protection.

FAILED COUPLING – In the case of a failed coupling attempt, bright red flashing LED lights assist the driver to quickly recognize a potentially costly mistake before attempting a tug test or driving away.

SUCCESSFUL COUPLING – A successful couple triggers high-intensity white LED lights, strategically aimed at the kingpin and lock for enhanced visibility during the inspection process, especially in poor weather and low-light conditions.
